[lptai](#) [taile](#) [taile](#)

I'm a software engineer with more than 4 years of experiences specializing in JavaScript (ES6, React, Redux, Webpack, and ExtJS) and Java (Spring, Apache, Hibernate, MongoDB)

SKILLS

Programing languages

Advanced

javascript (es6) | java

Framework & Tools

Advanced

react-redux, webpack, extjs, d3, gulp |
apache | nginx |
spring, springmongo, hibernate

Database

Intermediate

oracle | mongodb

Others

Advanced

agile, scrum | git, svn

Editor

Advanced

vscode

WORK EXPERIENCE

Senior Software Engineer at TYME | SME Area June 2019 - Current

<https://www.tyめbank.co.za/>

Skills acquired: agile (less) | react, redux | rxjs | java | microservice | kafka

We develop a new product target to small business (SME) for TymeBank. I participate in Agile team, mostly responsible for Frontend stuff (code review, design, etc). We have optimized the bundle file, remove vulnerabilities packages, upgrade packages to improve the reliability

Senior Software Engineer at ELCA January 2018 - May 2019

<https://www.secutix.com/>

As a developer, I participated in a product team with Agile/Scrum development process. Daily meeting with the team (VN-CH). Clarify requirement with the business owner. Do work breakdown structure for User Story, define impact, implement & write automation test for each new feature in User Story. Collaborating with the customer success team to analyze and support incident.

- Product mindset in Agile/Scrum development.
- Responsible for the quality of a Frontend module that helps to visualize seat maps with D3 & ExtJs.
- Backend technologies Java (Spring, SpringMongo, Hibernate), Oracle, MongoDB.
- Frontend technologies JavaScript (ExtJS, JQuery, React etc), CSS3 (SASS/LESS), HTML5.
- Estimation, design and development various modules.
- Bug fixing and maintain the product.
- Mentoring new members join the team.
- Re-research and sharing new technologies with team members and co-workers.
- Coordinating with other teams in the same project.

Software Engineer at SecuTix | ELCA August 2015 - January 2018

<https://www.secutix.com/>

PROJECTS

Box Office

Skills acquired: java | spring mvc | hibernate | extjs

- A module mostly is written by ExtJS (except payment), help operators sales their products (tickets/season tickets, etc).

- Develop new features for this existing module, bugs fixing.

Seat map

Skills acquired: [html5](#) | [canvas](#) | [svg](#) | [d3](#) | [extjs](#)

- A Frontend module, that helps operator draw and interact with seats which are visualized from a big stadium. Some big seat map with more than 80 000 seats, that means we have to find a way to deal with a big DOM element in application but have to keep good performance for the operator.
- Developing as a widget so that can reuse in other places in the application (sales configuration, sale seat map in Box Office module, etc).

Ticket shop

Skills acquired: [java](#) | [mongodb](#) | [jquery](#) | [sass/less](#)

- A big module that sales products on the internet from the portal configuration. The purpose is one shop for multiple customers with different customization by the configuration portal. The operator can configure different sales channels (B2C, B2B, etc) to sales products on this module.
- Build a scalable resale channel, that ables to display more than 30 000 tickets in a page by seat map instead of a long list ticket items. Using MongoDB to store cached data instead of calling the portal system.

Gravity December 2017 - April 2019

Skills acquired: [widget](#) | [react](#) | [redux](#) | [rest api](#) | [webpack](#) | [gulp](#)

- Develop widgets (providing as an iframe) for customers so that they can put on their website. An innovative topic, working directly with colleagues in Switzerland.
- Implement REST API to provide data for Frontend. Build UI component, widget for final purpose is reused and embedded into customer's website.

EDUCATION

Bachelor Information Technology at Ho Chi Minh University of Science
2011 - 2015
